RE: The Boeing Corporation, St. Louis Class, 1 Permit Modification to the Closure Plan; EPA ID: MOD000818963

Dear Mr. Haake:

The Missouri Department of Natural Resources' (DNR) Hazardous Waste Program (HWP) is in receipt of your Class 1 modification request dated September 25, 2000. This document request changes to the approved closure plan for the storage areas. The DNR-HWP approves your request with the conditions contained in this letter. This modification has been approved in accordance with 40 CFR 270.42(a). In accordance with that regulation, The Boeing Corporation (Boeing) shall notify all persons on the mailing list within 90 days of receipt of this approval.

CONDITIONS:

- 1) The closure plan has been revised to only require sampling of the soil under the Area 1 storage pad, not the pad itself. Boeing shall sample the asphalt and concrete of the storage pad, as required in the original closure plan.
- 2) Page 2 of the modification request states that the eleventh paragraph of the "Area 1 container storage" section has been deleted. This is incorrect. Paragraphs 11 and 12 have been deleted. DNR is not opposed to either deletion, or to letting the sumps remain open. However, Boeing shall submit a revised closure plan, stating clearly what the facility intends to do with the sumps.

Mr. Joseph W. Haake
December 22, 2000
Page 2

- 3) During the sampling of Area 2, the walls, floors, and grating shall be wipe sampled.
- 4) Boeing shall notify DNR at least 15 days prior to beginning any field work.

If you have any questions regarding this letter, please contact Mr. Brian McCurren, Environmental Engineer, at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM
